NovaBite AI

An AI supply-chain platform built for restaurants

Confidential Pitch Deck

THE PROBLEM

Restaurants waste $162B in food every year

- **30–40%** of food purchased by restaurants is thrown away
- Manual inventory management drives chronic over-ordering
- Supply-chain disruptions cause stockouts **15%** of the time
- Small & mid-size restaurants lack enterprise-grade tools
- Net margins of **3–5%** mean waste directly kills profit

> *"I spend 6 hours a week on ordering and still throw away $2,000 a month."*
>
> — Maria Chen, Owner, Lucky Dragon (Chicago)

OUR SOLUTION

An AI supply-chain platform built for restaurants

- **Predicts demand** from weather, local events, historical sales & seasonality
- **Auto-generates purchase orders** optimized for cost, freshness & waste
- **Monitors inventory in real time** via smart kitchen sensors and POS
- **Alerts on disruptions** — supplier delays, price spikes, recall notices
- **Learns & improves** — accuracy rises 12% in the first 90 days per site

Integrates with Toast, Square, Clover, and all major POS systems.

MARKET SIZE

A $28B market growing 18% a year

$28B

TAM — Global restaurant supply-chain software

$4.2B

SAM — US & Canada mid-market restaurants

$800M

SOM — Beachhead: US independent restaurants

18% CAGR, driven by post-pandemic efficiency pressure, food costs up 23% since 2020, labor shortages forcing automation, and ESG mandates.

BUSINESS MODEL

SaaS subscription + usage-based pricing

Tier	Price	Target
Starter	$299/mo	Single location
Pro	$499/mo	Multi-location (2–10)
Enterprise	Custom	Chains (10+)

+ Marketplace commission (3–5%) and data-insights packages ($50K–200K/yr).

Unit Economics

Burn $280K/mo · $1.2M cash · ~4 months runway — the reason for this raise.

COMPETITIVE LANDSCAPE

The only AI-native, POS-agnostic platform

Competitor	Focus	Weakness vs NovaBite
BlueCart	Ordering marketplace	No AI demand prediction, no waste analytics
MarketMan	Inventory management	Manual-first, limited ML, enterprise-only
Parsley	Recipe costing	Narrow focus, no supply-chain automation
xtraCHEF (Toast)	Invoice processing	Point solution, no predictive capability

Our moat: a demand model trained on 50M+ transactions, a POS-agnostic integration layer, a real-time sensor data flywheel, and 3 provisional patents.

TEAM

Restaurant domain + world-class ML + proven sales

Priya Sharma — CEO & Co-founder

VP Product at Toast (2016–22); grew supply-chain product 0 → $40M ARR. Stanford MBA, IIT Delhi CS.

James Park — CTO & Co-founder

Ex-Principal Eng at DoorDash demand-forecasting; built real-time prediction serving 25M orders/mo. PhD ML, UC Berkeley.

Sofia Rodriguez — VP Sales

Director of Sales at MarketMan ($5M → $22M ARR). 12 years in the restaurant industry.

Advisors

- **Danny Meyer** — Union Square Hospitality Group
- **Sarah Friar** — ex-CEO Nextdoor, board member Square

GO-TO-MARKET

Direct now, channel next, geographic later

Phase 1 — Now

Direct sales to independents in 5 US metros (NYC, Chicago, LA, Miami, Austin). 21-day deal cycle, 34% win rate.

Phase 2 — Post-raise

Channel partnerships with POS providers and distributors. LOI signed with Sysco for a co-marketing pilot (Q3 2025).

Phase 3 — 12+ months

Geographic expansion to Canada and the UK ($1.8B TAM for supply-chain software).

USE OF FUNDS

Raising $8M Series A at $40M pre-money

Category	%	Amount
Engineering & Product	45%	$3.6M
Sales & Marketing	30%	$2.4M
Operations & Support	15%	$1.2M
G&A / Buffer	10%	$0.8M

18-month milestones

- 1,500 restaurant locations on platform
- $8M ARR
- Launch Sysco channel partnership
- Series B ready at $100M+ valuation

WHY NOW, WHY US

The timing and the team both point the same way

- **Why now:** food costs at all-time highs, AI finally mature enough for real-time prediction
- **Why us:** the only team blending Toast domain depth, DoorDash ML, and MarketMan sales
- **Why it matters:** a $162B problem that is both profitable and meaningful to solve

> *"NovaBite cut our food waste 40% in the first quarter. It paid for itself in week three."*
